Ubisecure selects City Network as a partner for Ubisecures cloud solutions

A growing number of Ubisecure customers would like their products to be in form of a cloud computing services and run by reliable party. To meet the demand for cloud computing based solutions within identity and access control Ubisecure has chosen City Network as their dedicated partner in Sweden.

Companies and authorities now can easily and smoothly buy their cloud based solutions within access control and identity and offer their customers and partners fully automated self-registration process. It can secure users identity on a bank security level, delegate their powers of attorney issued to others, reduce the number of logins for the customer and provide Companies and authorities the ability to trust each other's registered customers via the so-called identityfederering. With Ubisecure products Companies and authorities can lower their registration costs up to 500 times per user and lower development cost up to 29 % for online services.

City Networks focus on safety and stability in operations are the basics for identity and products Ubisecure SSO and Ubisecure CustomerID, that could be offered as cloud computing services. City Network guarantees as well uptime, top class infrastructure and well trained staff, making it all together a very good package to cover the market needs in this area.

Apart from the security part, it will be very easy for Ubisecures partners and resellers to start operating and expand their capacity when needed. The goal of this cooperation is to start Ubisecure SSO or Ubisecure CustomerID as an online service in no time. Now everything is available through pressing some buttons, thanks to that you can use your time in a more effective way instead of installing and starting up servers.

"With our products within identity and control access, we allowed Companies and authorities a quick and simple start, but with our cloud computing services it is even more simple. With a quality cloud computing at City Network and a competitive business model, we aim to grow rapidly in this business area in the upcoming years.", says Johan Tullberg from Ubisecure.

"We always strive to be the market leader and cooperation with Ubisecure confirms once again that we can deliver a business-critical cloud services to market in a cost effective manner. "Said Johan Christenson from City Network
